

Loyset Compère – Paranympus salutat virginem

This motet by Compère is transcribed from the Anne Boleyn Music Book, to be found here:

<https://www.diamm.ac.uk/compositions/100901/>

There are other sources, but they are not available online.

Several recordings of this motet exist, by Alamire, Musica Secreta and Encantar. It's interesting to compare them: Alamire with men's voices, the other two with women's voices. No two performances have the same text underlay, which is never precise in the sources. Text underlay in this edition is inevitably slightly different from these performances. Text between parenthesis means blank space in the source, text in italics means that it's different from the source.

Bert Schreuder
